Software Development Timeline 8

Chapter 1
Introduction

1.1 Introduction

Write a short overview of the project, the problem it solves, and the target users.

1.2 Motivation

Explain why the project is needed and what practical problems motivated the work.

1.3 Application

Describe where and how the system can be used.

1.4 Objectives

1. Write the first objective.
2. Write the second objective.
3. Write the third objective.

Chapter 2
Software Requirements Specification

2.1 Purpose

Describe the purpose of the system and this requirements section.

2.2 Scope

Define the project scope, included modules, and excluded features.

2.3 Functional Requirements

- Requirement 1.
- Requirement 2.
- Requirement 3.

2.4 Non-functional Requirements

- Performance requirement.
- Security requirement.
- Usability requirement.
- Maintainability requirement.

Chapter 3
Methodology

3.1 System Design

Describe the design approach. Add diagrams with `\includegraphics` if needed.

3.2 Development Method

Describe the tools, technologies, and process used to develop the project.

Chapter 4
System Implementation Overview

4.1 Features of the System

Module	Capability
Module Name	Write what this module does.

4.2 Key User Interface

Describe the important pages, screens, dashboards, or forms.

Chapter 5
Risk Analysis

5.1 Assessing the Risk of Project

Risk	Probability	Impact	Assessment
Risk name	Medium	High	Explain the risk.

Table 5.1: Project risk assessment

5.2 RMMM Plan of the Project

Write the mitigation, monitoring, and management plan.

Chapter 6
Social and Security Impact

6.1 Social Impact

Explain the social effect of the project.

6.2 Security and Reliability

Explain the security and reliability considerations.

Chapter 7
Conclusion

Summarize the project outcome and future improvement areas.
